

FALEH ALAZMI

LANDSCAPE ARCHITECT | PROJECT DELIVERY & SITE SUPERVISION

Saudi National · Dammam, Saudi Arabia

+966 55 050 5820 · landscape.faleh@gmail.com · falehaz.myportfolio.com · linkedin.com/in/falehalazmi

PROFESSIONAL SUMMARY

Landscape Architect with 6+ years delivering public realm and high-specification residential landscape projects across Saudi Arabia. Design record spanning 35+ municipal parks and 3 urban squares in Riyadh. Promoted in 2023 to lead the Executive Estates landscape unit serving Saudi Aramco's leadership community in Dhahran, where I direct a field organisation of 23 across six residential districts, own design approval and inspection programmes, and control budgets and BOQs to fixed, non-movable delivery dates. Specialist in Xeriscape and water-efficient irrigation strategy for arid climates. Bilingual Arabic / English.

SELECTED PROJECTS

Public Realm — Riyadh

- **35+ municipal parks** — full design and documentation, including King Faisal Park, Al Sahafah Park, Dhahrat Laban Parks 1 & 2, Dirab Park, Hittin 17, Ishbiliyah 17, Al Aqiq 4, Al Janadriyah 3 & 4, Al Nasim Al Sharqi 17/36/50, and Al Rabwah 13.
- **3 urban squares** — Masqat Square, Astronaut Square, and Al Takhassusi Square.
- **Royal Court Entrance** — landscape design for a protocol-level government entrance.

Executive Estates — Saudi Aramco, Dhahran

- **Executive residential portfolio** — landscape design, execution and lifecycle management for the residences of Saudi Aramco's executive leadership (CEO, EVP, SVP, VP and Directors) across six residential districts.
- **Board Meeting landscapes** — led design and site preparation for the outdoor environments of high-profile corporate Board Meetings.

PROFESSIONAL EXPERIENCE

Lead Landscape Architect — Executive Estates

SRACO (Saudi Aramco contract) · Dhahran, Saudi Arabia | Jan 2021 – Present

Lead Landscape Architect · Mar 2023 – Present (promoted)

- Sole senior landscape architect for the Executive Estates unit — own design approval, inspection programmes and workforce direction across six residential districts serving Saudi Aramco's executive leadership (CEO, EVP, SVP, VP and Directors).
- Supervise a field organisation of 23 inspectors and headmen, sustaining 100% compliance with Aramco aesthetic, technical and HSE standards.
- Manage full guest-house operations for corporate Board Meetings — design, inspection and workforce coordination — delivered to fixed, non-movable dates with zero-defect tolerance.
- Lead the unit's digital transformation of inspection and reporting workflows, replacing manual paper processes with structured digital reporting.
- Mentor junior landscape engineers across the unit.
- Control schedules, budgets and BOQs; negotiate with suppliers and subcontractors to protect cost without compromising specification.
- Act as landscape interface for a protocol-level client group under confidentiality requirements.

Landscape Architect · Jan 2021 – Mar 2023

- Designed and executed landscape projects for the official residences of Saudi Aramco's executive leadership.
- Developed planting plans, irrigation layouts and seasonal maintenance programmes across multiple residential districts.
- Implemented water-efficient irrigation, Xeriscape planting, organic fertilisation and Integrated Pest Management (IPM).
- Conducted horticultural condition assessment and issued corrective maintenance plans, protecting asset value and preventing escalation to executive stakeholders.

Landscape Architect

Almuhaidd Consulting Engineers · Riyadh, Saudi Arabia | Nov 2019 – Jul 2020

- Delivered 50 landscape projects end to end — client brief, concept design, planting design, technical specification and final submission — including 35+ public parks and 3 urban squares for Riyadh municipal authorities.
- Produced planting plans, hardscape details, irrigation layouts and technical specifications compliant with Riyadh municipal and Saudi environmental design standards.

- Coordinated with architectural, civil and MEP disciplines to align landscape packages with wider site infrastructure and avoid clashes at construction stage.
- Applied arid-climate and native planting strategy to reduce long-term irrigation demand and municipal maintenance burden.

EDUCATION

Bachelor of Architecture (BArch) — Landscape Architecture

Imam Abdulrahman Bin Faisal University · Dammam, Saudi Arabia | 2014 – 2019

CERTIFICATIONS & MEMBERSHIPS

- Saudi Council of Engineers (SCE) — Membership No. 447303
